Mavelikkara, India • +918921047177 • joelsambmv@gmail.com

Summary

Motivated B.Tech Computer Science (AI & ML) student at Karunya Institute of Technology and Science with a strong interest in Machine Learning and Computer Vision. Experienced in developing AI-based applications using Python, Retrieval Augmented Generation (RAG). Skilled in working with frameworks and tools such as LangChain, Hugging Face, and Git. Completed various internships where I built practical projects, including AI models and web applications. Passionate about applying AI technologies to solve real-world problems and continuously learning emerging technologies.

Experience

Full Stack Developer Intern, 05/2024 - 06/2024

Octanet Solution Pvt Ltd, Odisha, India

Developed a Pet Adoption System using Html, CSS and JavaScript and a fully functional To-Do List

Machine Learning Intern, 04/2025 - 05/2025

Skillforge, Bangalore, India

Developed a Regression Model to predict salary of Jobs and created a classification model to predict the type of cyberbullying based on age, ethnicity, gender, religion, not cyberbullying, other cyberbullying

Generative AI Intern, 06/2025 - 07/2025

Young Minds Solution Pvt Ltd, Bangalore, India

Developed a Micro-Organism Classification Model and gained hands on experience in various Machine Learning Model

Education

X (ICSE), 2020 - 2021

Bishop Moore Vidhyapith, Mavelikkara, Kerala

Percentage: 93%

XII (ISC), 2022 - 2023

Bishop Moore Vidhyapith, Mavelikkara, Kerala

Percentage: 85%

B.Tech Computer Science and Engineering (AIML), 2023 - 2027

Karunya Institute of Technology and Science, Coimbatore, Tamil Nadu

CGPA: 8.12

Skills

- Python
- Java
- Computer Vision
- Machine Learning
- RAG
- Prompt Engineering

Languages

- Malayalam
- English
- Hindi
- Tamil

Certifications and Licenses

Python for Data Science, AI and Development · **IBM**
Prompt Engineering for Developers · **DeepLearning AI**
SnowPro Associate Platform Certificate · **Snowflakes**
Data Analyst · Big 4 Ready · **OneRoadmap**

Achievements

Presented a research paper titled “Borage Leaf Disease Identification and Pesticide Recommendation using Machine Vision” at the Second International Conference on Multi-Agent Systems for Collaborative Intelligence (ICMSCI 2026) organized by Surya Engineering College in association with the IEEE Computational Intelligence Society

Hobbies and Interests

- Playing Piano
- Coding
- Listening to Music

Projects

RAG based Study Assistant

Developed a Study Assistant based on the application of Retrieval Augmented Generation using COHERE API.

Real-time Sign Language Detection

Used advanced Computer Vision Technologies to develop a sign language to text and speech convertor.

Borage Leaf Disease Detection and Pesticide Recommendation System

Developed a plant disease detection system for borage leaves using machine learning and image processing techniques. Designed a Flutter-based mobile application that analyzes leaf images to detect diseases and provides pesticide recommendations, helping farmers take timely action.

Cyberbullying Detection in Social Media Platforms

Made a Classification System which uses Sentimental Analysis to classify social media comments as Positive or Negative.
